The Basic Concepts Foundation (BCF) was registered on the 18 September 2015.

The mission statement of the BCF:

To enhance teaching and learning in Foundation Phase classrooms using a holistic, developmental intervention approach to contribute towards sustained and systemic, evidence-based improvements in school learning.

The Foundation promotes cognitive education and focuses on developing a common core conceptual language and related thinking repertoires and dispositions to promote formal learning in young children.

The Foundation works in close collaboration with key educational institutions in South Africa and supports the implementation of the educational policy priorities in the Foundation Phase.
