Dr Louis Benjamin is the creator of the Basic Concepts Programme© (BCP). Louis has been a national Board Member of the International Association for Cognitive Education in South Africa since 2003 and is also a Board Member for Thinking Schools SA (TSSA). He served as Vice President for the Southern African Region of the International Association for Cognitive Education and Psychology (2007-2011). He also served as Chairperson of Western Cape Branch of the Southern African Association for Learners with Educational and Learning Difficulties (2002-2003).

BASIC CONCEPTS UNLIMITED

Basic Concepts Unlimited provides specialised educational services to the Early Childhood Development sector, schools and educational practitioners working with young children, particularly in the Foundation Phase (Grade R - Grade 3).

The Basic Concepts Programme© (BCP) is a holistic and developmentally orientated metacognitive intervention programme for young children who experience language, information processing and socio-emotional barriers towards learning.

The programme was developed to address the specific cognitive and developmental needs of young children as they progress from the concrete thinking of pre-school to the more considered, logical, and reflective thought required for formal learning (reading, writing, spelling and mathematics).
